

WP 06: upstart pilot work, June – Dec 2016 / Presentation of initiated work – FAIE

In August 2016 there was an invitation to cooperation within the LEVER project published at the ngo.pl portal (all-Polish internet portal directed to NGOs and their people). It was a partner search announcement - *wanted NGOs/non formal groups, active at sparsely populated areas, to cooperation at creating and delivering new cultural offer*. The invitation was also published in an all-Polish newsletter sent from the portal, on the FAIEs webpage and Facebook profile. There was also mailing with the invitation done to our target groups – local and regional institutions and organisations.

As a result we have received 5 answers from interested organisations/informal groups from the South of Poland (as we were inviting organisations/groups from the nearest voivodeships). After preliminary dialogues via telephone/exchange of e-mails, we intent to meet 3 of them. All of them have some specific ideas concerning what they would like to do/achieve, declare to have a group of people to be involved in the activities, support of the local authorities, and motivation to long-term cooperation.

We have two meetings scheduled for this week.
